

Why You Should Outsource your Billing From a Doctor's Point Of View!

Dr. Benjamin Rokhsar Independent DPM Concierge Representative

Streamline your billing process. Save time and money.

Our billing software saves you money (less staff and equipment costs), saves you time (we do it all!), and mostly importantly improves your bottom line.

We have saved our clients a lot of money. We could do the same for you, we offer everything for Medical Billing, Portals, EMR, Kiosk systems, Insurance credentialing, and more. We have developed a close relationship with all large insurance companies, as well as the state specific insurance companies. The experience and expertise of our staff ensures optimum cash flow, no matter which state your practice is located in. We pride ourselves in exceeding industry standards for days in A/R and A/R percentage over 90 days. Our days in A/R average 10 days for electronic claims and less than 10% of our A/R is over 90 days. Aggressively, we achieve these standards with accurate claim submission, follow up and successful appeal resolutions. Our growing success is a direct result of our satisfied clients.

We have over 30 years of combined experience, education and knowledge with the unique ability to be flexible and adjust to your individual needs. Software To Systems, Inc. (STS)...Well established in practice management with integration of EHR and a proven track record in increasing, improving & achieving clients net cash revenue cycle performance & education of clinical meaningful use.
