

**Our EMR referral program is available to anyone in the medical industry or even non medical professionals. If you know of a medical office or provider in need EMR products and/or services, this referral program is for YOU.**

Do you know someone that is still using paper charts? With less than 25% of medical practices in the United States using EMR (Electronic Medical Records), there are millions of physicians who need to purchase, leverage and use an EMR solution. EMR will help provide patients with safer, smarter health care, the ROI on EMR is real and then there is the Health Care IT Stimulus money (up to \$ 64,000.00 per physician).

Our EMR referral program is simple. Talk to a medical professional about Software To Systems EMR solutions, then visit <http://www.software2sys.com> and click on "Referral Program". Quickly enter the details and that's it! Enter as many leads as you want.

We follow up on leads entered within 24 hours, and when the lead becomes a sale, you will receive a check for \$250.00 to \$500.00 per closed lead.

**So what are you waiting for? Network, get names, get busy, register leads and make some serious money!**

**See terms and conditions**
